

**Prompt:**

Identifying Key Terms

- Think about words or terms that you believe are important in creating “good” writing (think about your own writing and your method of writing...what terms would you associate with this?). **Generate a list of 5-10 terms and define them.**
- Why do you believe the list you have created is important to writing, **specifically your own writing?**

**Response:**

- Structure- There is a layout of the work that makes sense
- Logically flows- makes sense to the reader logically
- Time- writing with a sufficient amount of time, not cramming
- Personality- something that shows the authors real thoughts
- Originality- something that differentiates it from other pieces
- Change- that the work changes something for the reader, like perspective
- I believe these terms are important to my writing because they are everything I would expect out of something that is considered “good” writing.
